Packaging Sourcing Checklist

Confirm product type, capacity, size, material, barrier requirements, closure, target market, expected quantity and packaging purpose.

Applicable Scope
Use when preparing a packaging brief or comparing packaging options before requesting samples or a quotation.

Check Method
Compare your product requirements with the proposed packaging specification. Record open questions for the packaging team.

Required Documents
Product information, dimensions or reference sample, packaging brief, target-market requirements and expected order quantity.

1. Product Information

- [ ] **Product type**
  Identify the product, its form and how it will be packed.
- [ ] **Capacity**
  Confirm the intended fill weight, volume or number of units.
- [ ] **Dimensions**
  Confirm the product and packaging dimensions, units and required fit.

2. Material & Barrier

- [ ] **Material**
  Identify the proposed material and structure; list alternatives that still need review.
- [ ] **Barrier requirements**
  Record any moisture, oxygen, light or odor protection requirements for the complete package to be evaluated.

3. Closure & Function

- [ ] **Closure type**
  Specify the intended closure, filling and sealing method, and any required opening or reclosure function.

4. Target Market

- [ ] **Target market**
  Identify the destination market and provide the applicable packaging or labeling requirements for review.

5. Quantity & Purpose

- [ ] **Expected quantity**
  State the expected quantity and any variant or artwork split to be quoted.
- [ ] **Packaging purpose**
  Clarify whether the package is for primary packing, retail display, gifting, shipping or another use.

Checking items records preparation only. It is not a test report, certification or final approval. Use the criteria agreed for your project.
