Sample Evaluation Checklist

Check size and fit, material feel, print quality, closure function, opening experience and consistency with the confirmed specification.

Applicable Scope
Use when reviewing a packaging sample before confirming the next project stage.

Check Method
Inspect and handle the sample, check dimensions and test its intended use against the confirmed specification.

Required Documents
Sample, confirmed specification, dimensioned drawing, artwork proof and any agreed functional test criteria.

1. Size & Material

- [ ] **Size and fit**
  Measure the sample and check how the intended product fits, allowing for the agreed packing method.
- [ ] **Material feel**
  Compare the material feel, stiffness and overall handling with the agreed reference.

2. Print & Specification

- [ ] **Print quality**
  Compare color, image and text appearance, placement and finishes with the approved proof.
- [ ] **Consistency with confirmed specifications**
  Record differences between the sample and confirmed dimensions, material, artwork or structure.

3. Closure & Opening

- [ ] **Closure function**
  Operate the closure and check it against the agreed functional criteria; record any issue for review.
- [ ] **Opening experience**
  Assess the ease of opening and closing in the intended use sequence.

Checking items records preparation only. It is not a test report, certification or final approval. Use the criteria agreed for your project.
