Quality Inspection Checklist

Use the agreed inspection criteria to check appearance, dimensions, printing, sealing, quantity, packing method and batch records.

Applicable Scope
Use for a packaging inspection against the criteria agreed by both parties for the relevant order and batch.

Check Method
Use the agreed inspection method, sampling plan and acceptance criteria. Record observations and unresolved differences for review.

Required Documents
Agreed inspection criteria, order specification, approved sample or proof, quantity and packing details, and batch records.

1. Appearance & Printing

- [ ] **Appearance**
  Check visible defects and overall appearance using the agreed inspection criteria.
- [ ] **Printing**
  Compare print content, color, registration and finishes with the approved reference.

2. Dimensions & Sealing

- [ ] **Dimensions**
  Measure the defined points using the agreed method and compare with confirmed dimensions and tolerances.
- [ ] **Sealing**
  Check seals using the agreed method and criteria; record any issue requiring further evaluation.

3. Quantity & Packing

- [ ] **Quantity**
  Check the inspected quantity, pack counts and order breakdown against the agreed records.
- [ ] **Packing method**
  Check the inner and outer packing arrangement and identification against the confirmed packing details.

4. Batch Records

- [ ] **Batch records**
  Confirm batch identification and retain the agreed inspection record, including issues requiring review.

Checking items records preparation only. It is not a test report, certification or final approval. Use the criteria agreed for your project.
